

Rocket

```
graph LR; Rocket -- "sensor data" --> IPSP[Impact Point Prediction System]; IPSP -- "predicted impact point and covariance" --> ASV;
```

The diagram illustrates a three-stage process. It begins with a box labeled 'Rocket' on the left. A horizontal arrow points from this box to a central box labeled 'Impact Point Prediction System'. Above this arrow is the text 'sensor data'. From the central box, another horizontal arrow points to a final box on the right labeled 'ASV'. Above this second arrow is the text 'predicted impact point and covariance'.

sensor data

**Impact Point
Prediction System**

predicted impact point
and covariance

ASV
